## Class 1 Maths Magic

### Chapter 11: Numbers Notes

#### Numbers

This chapter is the advanced version of all the numbers, shapes that you have learned in the previous chapters. We learn about the numbers that are far more than just only 10 and 20 with the help of sugarcane isn't look similar to the match stick and grass on top of it. Right? So, let's learn and practice the numbers and then we will use them to crack the puzzle with them and also try to find out the missing number with the help of numbers you're going to learn in class 1 mathematics chapter 11.

Students learn to compare numbers using terms like greater than, less than, and equal to. They also get introduced to the corresponding symbols for these comparisons, helping them visually and conceptually understand the relative sizes of numbers. The concept of odd and even numbers is introduced.

Numbers from 51 to 70: Fill in the Blank

Ten	Ones	Number
7	1	___ (71)
___ (5)	7	57
